

ACCRAPLY REVOLVE™ RT2

Improve operational output, reduce downtime, and enhance productivity with Accraply's next generation Seaming solution - the Accraply Revolve RT2.

The Revolve has an intuitive design that requires minimal operator dependency and enables you to streamline and improve your operations.

Accraply's seaming solution offers an operator-friendly design that tops the fastest speeds on the market with a 600 meters per minute running speed.

IMPROVE OPERATIONAL OUTPUT, REDUCE DOWNTIME AND ENHANCE PRODUCTIVITY

- Improve your output while maintaining quality - the Revolve is the fastest commercially available seamer on the market
- Decrease your setup time and increase uptime by eliminating set-up variables and opportunities for operator error (5 minute job set-up with unlimited recipe repeatability)
- Reduce waste and enhance productivity via the Revolve's Automatic Roll Map Generating option which enables identification of upstream printing process errors

SIMPLIFY AND STREAMLINE YOUR OPERATION WITH AN INTUITIVE DESIGN THAT REQUIRES LITTLE OPERATOR DEPENDENCY

- Non-crashable forming table: intelligent machine design restricts the operator from inputs that drive it out of specification - reducing operator dependency and improving uptime by eliminating forming table crashes
- Leverage a next generation controls platform coupled with a full color HMI that dramatically simplifies operation and increases throughput via step-by-step on-screen help guides, diagnostic reporting and preventive maintenance alerts. In addition, efficiency reporting, video tutorials, and on-board parts ordering are standard features
- Reduce waste and rework with automatic layflat correction: machine automatically adjusts layflat to specification reducing operator dependency and ensuring premium roll quality

BUILT TO FIT ANY OPERATION & OFFERING UNPARALLELED FLEXIBILITY, OPERATOR-FRIENDLY DESIGN ALLOWS FOR CUSTOMIZATION & SCALABILITY

- Choose the right unwind and speed to fit your business with flexible and custom speed and rewind options
- Smart guarding designed to allow for safe loading and unloading while the machine is running
- Innovative, operator-centric options including the Management Information Systems (MIS) that allows the machine to pull job data and set itself up accordingly

We want to earn your trust.

All Accraply equipment is designed and configured specifically for your application, plant, product and operating requirements. We invite you to work with us throughout the entire planning, purchasing and production cycle to discover the benefits of single source automation, integration and the most advanced technology available in the industry today.

We promise excellent support.

Aftermarket service isn't an afterthought. We service all of our equipment for the life of the machine, including the installed base of acquired brands. Our service team provides consultative audits, technical assistance, spare and replacement parts, change parts, upgrades, field service and pre-owned equipment with exceptional commitment to customer satisfaction.

We provide global expertise, served locally.

Our global expertise, delivered locally, allows us to be a focused and responsive partner that supports all your converting needs.

Contact one of our experienced Sales Engineers today to discuss how the Accraply Revolve Platform can be installed by our certified service team today!

BW Packaging Systems

Accraply is one of five companies represented in Barry-Wehmiller Packaging Systems, a \$700+ million business with 37 locations and more than 3,000 team members in nine countries around the world. Through BW Packaging Systems, customers can find more than just a single machine. They can leverage and combine the primary packaging, labeling and end-of-line packaging systems offered by the different Barry-Wehmiller packaging companies: Accraply, BW Flexible Systems, BW Integrated Systems, Pneumatic Scale Angelus and Synerlink.

BW Packaging Systems companies are part of Barry-Wehmiller, a \$3 billion global supplier of manufacturing technology and engineering consulting for the packaging, corrugating, sheeting and paper converting industries.
